

Reduce. Reuse.
Recycle. Relax.
Relief. Rewards.

Experience optimized cleaning efficiency while minimizing time spent managing the process. Maximize your Washer Washer's productivity by using cutting edge data acquisition techniques & Internet monitoring. End the guesswork; no more manual logging operating parameters. Let us audit your recycler and tell you what needs to be done and exactly when...

Why interpret this?

When we can do it for you...

Add the WW Data Logger
Option to your recycler;
include our Monitoring
Service & for less than the
cost of two Service Calls,
We've Got Your Back!

HELP! RELIEF... ARBORTECH.

HELP!

WWPro Series
Recycler Ready for
Shipment

Reductions in staff, from the office to the shop floor to your maintenance group essentially mandates keeping cleaning operations in use for longer periods than ever before. No time or personnel to dump and recharge your wash tanks... But you already know that recycling makes more sense today than at any prior point in our history; you own a Washer Washer! Even so, considering cutbacks in staff, increased cleanliness demands, more abundant and/or more difficult contaminants due to new sources for the parts or metals themselves, it is getting tougher to maintain parts' quality let alone keep an eye on your recycling system(s). Why not eliminate checking and recording your recycler's performance from the human resources equation?

RELIEF...

Now, you can even further reduce hands-on requirements for your recycler(s)... with our stand-alone, add-in Washer Washer (WW) Data Logger Option and Arbortech's Monitoring Service. You know how drastically the necessity to interact with your wash tanks was reduced by your WW, how it already saves you a lot of time and money. Adding the option to engage us to check system performance on a regular basis and send an e-mail or make a phone call if something needs to be addressed, well, that's one more set of tasks removed from your shoulders.

Summarizing what we'll do for you:

- **Monitor & Interpret all key data - keeps your WW humming**
- **Chart your WW's operating pressures and temperatures**
- **E-mail and/or telephone you with instructions to follow**
- **All for less than the cost of two service calls per year**

ARBORTECH.

Other than a walk-by every now & then and timely responses to the directions provided through our monitoring, your Washer Washer becomes almost invisible, obvious only when examining your better-looking bottom line!

Reduce maintenance staff overload. Maximize WW performance all the time. Tiny capital expense. Annual monitoring payment. Never again face finger-pointing among line personnel, QC and maintenance. Take proactive steps instead of responding after damage has been done.

- **Call or e-mail us for a quote**
- **Full service insurance @ less than \$0.40/hour**

Why hesitate? Waiting for something to go wrong?
